

# The Journal of Biological Physics and Chemistry

2011

Volume 11, Number 4

## CONTENTS

### Acknowledgment

p. 130

### Editorial

p. 131

### Contaminated aircraft cabin air

*S. Michaelis* pp. 132–145 [Abstract](#)

### Exposure of offshore workers to organophosphate-containing engine oil used on aeroderivative gas turbines

*H. Erikstein* p. 146 [Abstract](#)

### A critique of recent air sampling data collected on aircraft: how much exposure to neurotoxic fumes is acceptable?

*J. Murawski and S. Michaelis* pp. 147-151 [Abstract](#)

### The scientific adequacy of the present state of knowledge concerning neurotoxins in aircraft cabin air

*J.J. Ramsden* pp. 152–164 [Abstract](#)

### Exposure to triaryl phosphates: metabolism and biomarkers of exposure

*C.E. Furlong* pp. 165–171 [Abstract](#)

### TCP (tricresyl phosphate): pilot, aircrew and passenger safety and secondary myalgic encephalomyelitis

*B.M. Hyde* pp. 172–179 [Abstract](#)

### Cognitive function following reported exposure to contaminated air on commercial aircraft: methodological considerations for future researchers

*S. Mackenzie Ross, V. Harrison, L. Madeley, K. Davis, K. Abraham-Smith, T. Hughes and O. Mason* pp. 180–191 [Abstract](#)

### Safety delayed is safety denied

*D. Zaharik* p. 192 [Abstract](#)

### Administration of a safety system: further lessons from Mt Erebus?

*C. Standing* pp. 193–200 [Abstract](#)

### The international crew health survey

*D. Passon* pp. 201–207 [Abstract](#)

### Economic consequences of ignorance about aerotoxic syndrome

*P. Parsons* p. 208 [Abstract](#)

**Workshop summary and conclusions: human sacrifice–road speed–responsibility–economics**

*M. Hooper* pp. 209–215 [Abstract](#)

**A conference most revealing: aircraft cabin air quality**

*G.C. Holt* pp. 216–220 [Abstract](#)

[back](#)
